

Metadata for CA_population_data.csv

Column Name	Description	Data Class	Units
CountyFIPS	4-digit county FIPS number	integer	NA
County	county name	factor	NA
Year	year of data	integer	NA
Population	annual population for each county	integer	number of people

This dataset was retrieved using the tidycensus package in R. It was given specific inputs to pull annual American Community Survey (ACS) data for counties in California from 2005-2019. Annual ACS data are only available for counties with populations greater than 65,000, so this dataset only includes California counties that meet that guideline.
